**San José, Calif. –** This evening, officials at [Norman Y. Mineta San José International Airport](#) (SJC) welcome the return of JetBlue with daily, nonstop service to [Boston Logan International Airport \(BOS\)](#). The flight represents SJC's first long-haul service resumed since the global pandemic began last year. The red-eye flight recommences tonight, departing SJC at 9:15 PM aboard an Airbus A320 aircraft.

Tonight's flight constitutes JetBlue's return to San Jose since temporarily discontinuing service from the Airport in April 2020 due to pandemic-related travel declines.

"We're pleased to welcome the return of this nonstop service to Boston and thank our partners at JetBlue for this renewed investment," said John Aitken, Mineta San José International Airport Director. "Resuming daily, long-haul service symbolizes a welcome return to normalcy. Our team has been working throughout the pandemic to keep our airport safe and moving forward, and we look forward seeing more travelers in our terminals as offerings continue to expand."

The resumed flight is JetBlue's only nonstop flight from San José and the only nonstop service from the Airport to Boston, arriving in Boston at 5:50 AM (EST).

To book a nonstop flight from San José to Boston on JetBlue, visit <https://www.jetblue.com/>.

### **SJC: Transforming How Silicon Valley Travels**

Mineta San José International Airport (SJC) is Silicon Valley's airport, a self-supporting enterprise owned and operated by the City of San Jose. The airport, now in its 71st year, served nearly 15.7 million passengers in 2019, with nonstop service across North America and to Europe and Asia. SJC was America's fastest-growing major airport the past four years, based on percentage increase in passengers served. For more airport information, visit <https://www.flysanjose.com>.
